

Stannah Passenger *lifts* at INTECH

Stannah Passenger Lifts provide a view at INTECH

Stannah have installed a glass shafted two stop passenger lift at Hampshire's unique science and technology centre, INTECH.

The centre is a 'hands-on' exciting learning experience with over 100 exhibits for visitors to investigate.

The Stannah lift is both functional and educational as it runs within a glass shaft, so demonstrating its hydraulic technology at the touch of a button. It crucially provides access for disabled visitors to both exhibition levels within the impressive purpose built centre.

**Stannah -
The largest independent lift
manufacturer in the UK**

Sally Hall, Deputy Director comments:

"The Centre is set high on Morn Hill just outside Winchester. Installing a passenger lift was essential for the easy movement of people around our building. Our glass building purposefully maximises the natural light available from our elevated geography so the glass shafted lift fits perfectly in its environment. The bonus is being able to view the technology that drives the lift – a working exhibit we couldn't do without!"

The Stannah Difference!

All Stannah Passenger Lifts can be supplied with their own structure-supported shaft making it possible to position them almost anywhere. If space is limited the traditional motor room can be replaced with a Motor Room Cabinet (MRC) that can be recessed into an adjacent wall or even positioned remotely up to 8 metres away from the shaft on any level.

Stannah's System 21 is the UK's most comprehensive range of hydraulic passenger lifts, 6 -16 person, for low to medium rise buildings. Following installation Stannah Lift Services will ensure your lift remains in good working order 24 hours a day, 7 days a week.

Stannah's System 21 is a comprehensive range of hydraulic passenger lifts, 6-16 person, for low to medium rise buildings.
New motor-roomless options available.
