

Stannah Passenger *lifts* at Dorney Lake

Stannah Passenger Lifts at Dorney Lake

UK manufacturer Stannah have installed a range of lifts to ensure 'access for all' at the Dorney Lake Boathouse, the welcome home venue of the successful British Olympic Rowing Team.

The stunning boathouse, built within spectacular views of Windsor Castle, is a brand new facility at Eton College. The imposing building includes housing for 200 boats, state-of-the-art gymnasium, hospitality suites and a spectacular viewing deck overlooking the rowing lake.

**Stannah -
The largest independent
lift manufacturer in the UK**

CASE STUDY

Eton's project manager Roderick Watson comments:

"We are very proud of our achievements at Dorney Lake, the facility is a valuable addition to the world of rowing. The range of Stannah Lifts have ensured access to all parts of the building, and in particular ensured disabled rowers can move around the site independently."

Easy Access

The Stannah passenger lifts provide easy access over three levels at each end of the building. The first lift takes you from the reception area to both floors above, the second lift provides access to a mezzanine floor and at full height opens directly onto the viewing deck. The Stairiser, a platform stairlift, provides the disabled access between the gymnasium and the disabled changing facilities.

Rowing Lake

The rowing lake, which currently stretches over 1000 metres was extended to 2000 metres at the end of 2001. Primarily the training ground of pupils at Eton College, Dorney Lake also provides rowing opportunities for pupils from surrounding schools. The venue is ideal for corporate events and has enjoyed live BBC coverage of the 'after the Olympics' Supersprint Rowing.

Wholly funded by Eton College, the Dorney Lake Boathouse was officially opened on 10th June 2000 by the Minister of Sport, Kate Hoey and five times Olympic Gold Medalist, Steve Redgrave.

Stannah's System 21 is a comprehensive range of hydraulic passenger lifts, 6-16 person, for low to medium rise buildings. New motor-roomless options available.
